Boosting healthcare

Life expectancy has increased by 10 years longer compared to five years ago all over the world—thanks to better quality of life, continual developments in medicine and greater healthcare accessibility.

To continue, well-trained doctors and biomedical scientists are needed.

This is one reason why the Newcastle University UK established an international branch campus in Kuala Lumpur in 2009 called NUMed Malaysia.

It opened in 2011 and is secure, sustainable and pedestrian-friendly.

The leading medical university provides undergraduate degrees in Medicine (MBBS) and the Biomedical Sciences (BSc), plus opportunities for foundation and postgraduate studies. The programmes of study delivered in Malaysia are identical to those of Newcastle’s UK-based provision and lead to the award of the same degrees, conferred fully and exclusively by Newcastle University, UK.

Studying in NUMed Malaysia allows students to obtain a reputable UK qualification from an internationally recognised university at a cost much lower than studying a similar degree in the UK.

NUMed aims to deliver cost-effective yet high-quality medical and biomedical programmes for the benefit of research, development and lifelong education in Malaysia and the greater Asian region.

The programmes are delivered by motivated and well-qualified faculty complemented by carefully considered student support strategies and underpinned by a firm ethic of scholarship.

NUMed Malaysia’s intention is to deliver a range of undergraduate biomedical and medical degree programmes with the standard of those in Newcastle University, UK, but contextualised to Malaysian circumstances and cultural diversity.

Many of the programmes offer opportunities for periods of study in the UK.

The Biomedical Sciences

BSc Honours: This three-year programme is split into two parts, which span the first two years at the state-of-the-art Newcastle campus in Newcastle, UK. The second part would be the final year of study undertaken at the Newcastle campus.

Upon successful completion of the entire programme, students are awarded BSc (Hons) Biomedical Sciences, conferred by Newcastle University UK.

The MBBS programme also has an intake of one student for MBBS and Biomedical Sciences, which are now open.

students are encouraged to apply early.
