A more efficient route

THOSE aspiring to become medical doctors have an alternative and more efficient route to medical school, the Foundation Certificate at Newcastle University Medicine Malaysia (NUMed).

What is the Foundation Certificate?
Based in Malaysia at Newcastle University’s fully-owned medical campus NUMed, the Foundation Certificate in Biological and Biomedical Science is a 12-month course that you take instead of your final year of A-levels.

If you meet the tailored course’s requirements, there is an added bonus - you secure a place at NUMed. As opposed to A-levels, the course will fully prepare you to study medicine or biomedicine at the university with tailored modules such as “Foundation of Medical Studies”, and hands-on classes such as “An Introduction to Anatomy”, giving you the opportunity to experience life as a medical student. You will also be taught Physics, Chemistry, Biology, Mathematics, Science, Engineering, English and Medical Studies as these subjects are vital in the field of medicine.

NUMed’s Foundation Certificate will give you the opportunity to learn about all the courses on offer such as the MBBS and BSc (Hons) Biomedical Science programmes. On campus, you will also be integrated with students who are already on the programmes, and you will be taught by the lecturers of those courses.

Why study the Foundation Certificate?
World-class education: NUMed Malaysia is 100% owned by the leading UK University, Newcastle University. Therefore the Foundation Certificate, just like our MBBS and BSc (Hons) Biomedical Sciences Programmes, is conferred by Newcastle University UK. Newcastle University, part of the esteemed UK Russell Group, has more than 175 years of history and a world-class reputation for research excellence, so you can be certain that you will receive an excellent education during your time with us.

Pathway to a medical or biomedical degree: If you successfully complete the Foundation Certificate to the required level, you will be offered automatically a place in one of our medical degrees. This means that you will not be competing for places on those programmes.

Same quality, fraction of the cost: Studying NUMed’s Foundation Certificate in Biological and Biomedical Sciences means that you are getting the same quality of tuition as studying at the UK campus, but at a fraction of the cost.

State-of-the-art facilities: We have unparalleled medical facilities in our campus, as Datuk Dr Noor Hisham Abdullah, Director General of Health, Ministry of Health, said “The best medical school in Malaysia.”

with UK’s Southampton and Reading Universities next door. EduCity Sports complex, with an outdoor and indoor arena, sports fields, 50m swimming pool, and gym, is also just around the corner. On campus, you’ll find a dance studio, games room, pool tables and wide screen TV complete with Astro subscription. There’s also a huge number of societies and organisations to cater to any passion or interest.

**Excellent student support:** You will be supported throughout your university life from first application to graduation. You will be assigned a personal tutor to guide you throughout your studies and we offer study skills, IT, and well-being support during your time with us. Regardless of the support you need, we are here to help.

If you are thinking of embarking on a life-changing career in medicine, we want to help you succeed by offering you a world-class medical education. NUMed’s Foundation Certificate is an accessible, affordable, and realisable first step to achieving your goals.

**About NUMed**

Newcastle University UK, has established an international branch campus in Johor, Malaysia to provide its undergraduate degrees in Medicine (MBBS) and the Biomedical Sciences (BSc). Both programmes offer opportunities for periods of study in the UK. A one-year Foundation Certificate in Biological and Biomedical Sciences is also available, the successful completion of which will lead to progression to the MBBS or BSc (Hons) Biomedical Sciences programme.

All programmes of study are equivalent to those of Newcastle's UK-based provision, and lead to the award of the same degrees. By choosing to study at NUMed Malaysia, students will obtain a reputable UK qualification, from an internationally recognised university, at a cost significantly less than that of studying in the UK.
