EndNote
Using EndNote to add citations and references in PowerPoint

You can use EndNote Desktop to add references to your PowerPoint presentations.

Please note: EndNote Online is not currently compatible with PowerPoint.

To begin, open both your EndNote Library and your PowerPoint presentation.

In PowerPoint, click on the EndNote tab and check that the chosen style is correct.

Adding a citation

Click your cursor into a textbox on your slide in the location you wish to add the citation(s).

You then have two options, you can use either method:

1. Insert Citation
   Click the Insert Citation button in the EndNote tab. In the pop-up box that appears, search for the record you need and click insert.

2. Insert Selected Citation(s)
   First, in your EndNote Library, select the record(s) you want to add. Then return to PowerPoint and click on the Insert Selected Citation(s) button.
Adding a Reference

Click your cursor into a textbox on your slide in the location you wish to add the full reference(s).

You then have two options, you can use either method:

1. Insert Reference
   Click the Insert Reference button in the EndNote tab. In the pop-up box that appears, search for the record you need and click insert.

2. Insert Selected Reference(s)
   First, in your EndNote Library, select the record(s) you want to add. Then return to PowerPoint and click on the Insert Selected Reference(s) button.
